*The agenda items listed below may be considered in a different order. All items appearing on this agenda, whether or not expressly listed for action, may be deliberated upon and may be subject to action.*

**Purpose:** The main focus of the April 19, 2016 meeting of the Delta Independent Science Board (Delta ISB) is to hear from experts in the fields of Delta monitoring and adaptive management. Panelists invited to discuss monitoring activities in the Bay-Delta will have an exploratory/educational discussion with the Delta ISB to help the members ready themselves for a review, determine how to organize and approach such a review, and help to define the scope. Panelists invited to discuss adaptive management will discuss ways to address impediments identified in the ability to practice adaptive management, how to make progress from words and plans to actions, and the Delta ISB's continued involvement working with the Council and others as they deliberate how best to convene a workshop or review panel focused on coordination of adaptive management in the Delta.
